CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 60 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. Childhood obesity is highly prevalent in the U. S. and has become a global epidemic. The 2007-2008 National Health and Nutrition Examination Survey data showed that 17 of U. S. children and adolescents (ages 2-19) years were obese, and over 30 were overweight or obese. Childhood obesity leads to obesity in adulthood and many other serious health conditions, such as cardiovascular, metabolic, and psychosocial illnesses. To assess the effectiveness of existing childhood obesity prevention efforts, the Johns Hopkins University Evidence-based Practice Center completed a systematic review on childhood obesity prevention studies conducted in high-income countries. This report systematically reviewed seven key questions: What is the comparative effectiveness of school-based interventions for the prevention of obesity or overweight in children What is the comparative effectiveness of home-based interventions for the prevention of obesity or overweight in children What is the comparative effectiveness of primary care-based interventions for the prevention of obesity or overweight in children What is the comparative effectiveness of childcare setting-based interventions for the prevention of obesity or overweight in children What is the comparative effectiveness of community-based or environment-level interventions for the prevention of obesity or overweight in children What is the comparative effectiveness of consumer health informatics applications for the prevention of obesity or overweight in children What is the comparative effectiveness of multi-setting interventions for the prevention of obesity or overweight in children Though the strength of evidence is moderate to high for school-based interventions, the limited number of studies and insufficient or low strength of evidence to support interventions in other settings made it difficult to conclude that interventions in other settings could effectively prevent childhood obesity. Based on the evidence gaps in...
