# Lifetime Data: Models in Reliability and Survival Analysis

Filesize: 7.48 MB

Reviews

The publication is easy in read through better to recognize. It usually will not cost too much. You wont feel monotony at whenever you want of the time (that's what catalogs are for concerning when you question me).
(Rebecca Bechtelar)

LIFETIME DATA: MODELS IN RELIABILITY AND SURVIVAL ANALYSIS

Book Condition: New. Publisher/Verlag: Springer, Berlin | Statistical models and methods for lifetime and other time-to-event data are widely used in many fields, including medicine, the environmental sciences, actuarial science, engineering, economics, management, and the social sciences. For example, closely related statistical methods have been applied to the study of the incubation period of diseases such as AIDS, the remission time of cancers, life tables, the time-to-failure of engineering systems, employment duration, and the length of marriages. This volume contains a selection of papers based on the 1994 International Research Conference on Lifetime Data Models in Reliability and Survival Analysis , held at Harvard University. The conference brought together a varied group of researchers and practitioners to advance and promote statistical science in the many fields that deal with lifetime and other time-to-event-data. The volume illustrates the depth and diversity of the field. A few of the authors have published their conference presentations in the new journal Lifetime Data Analysis (Kluwer Academic Publishers). | Preface. On the Entropies and Mutual Information of Some Bivariate Continuous Distributions Used in Reliability; M. Ahsanullah, M. Habibullah. Initial Conditions Problem in Event History Analysis: An Indirect Inference Procedure; M.Y. An. Analysis of Survival Data Under Competing Risks with Missing Cause of Death Information: Application and Implications for Study Design; J.W. Andersen, et al. Conditional Proportional Hazards Models; B.C. Arnold, Y.H. Kim. A Comparison of Conditional and Unconditional Inference Relating to Log-Gamma Distribution; N. Balakrishnan, P.S. Chan. Universal Formulas for Treatment Effects from Noncompliance Data; A.A. Balke, J. Pearl. Fundational Issues Concerning the Analysis of Censored Data; R.E. Barlow, P. Tsai. Burn-in at the Component and System Level; H.W. Block, et al. Identificationof Dependent Competing Risks Models; K. Carling, T. Jacobson. Reliability Modelling for Optical Amplified Communication Systems; M. Chown, G.A. Whitmore. A Parametric Approach...
